2001 Annual Index for *SIMULATION*

The index for articles in *SIMULATION* for 2001 appears in five parts. First is an Index by Title: Technical Articles and Notes. This list includes (1) article numbers, (2) titles, (3) first authors, (4) volume, number and month, and (5) pages. The Index by Title: Running Columns and Stories includes the same basic information. The other indices refer back to the article numbers that appear in this index. A slash (/) indicates a truncated title. The full title appears in the Index by Author.

The Index by Author lists all authors, but complete article information appears only under the listing for the first author: (1) name, (2) article number, (3) article title, (4) co-authors, (5) issue volume and number, and (6) pages. For co-authors, the index refers you to the first author's listing, or to the article number in the Index by Title.

The List of Special Issues includes the issue's subject, date, guest editor(s) and number of articles. The Index by Keyword includes the keyword(s), followed by the (1) article number, (2) issue volume, number and month, (3) pages, and (4) first author.

The SCS Website includes full titles, author information and abstracts for all Technical Articles and Technical Notes. Go to www.scs@scs.org and select Publications. Then select *SIMULATION*, then Table of Contents for 2001, Volumes 76 and 77.
